

NGUYEN VAN NGHI

SOFTWARE DEVELOPER

+84 364 920 299 · vannghibg03@gmail.com · linkedin.com/in/nghinv · github.com/nghinv203

OVERVIEW

- Early-career Software Developer with around 1.5 years of professional experience (plus an on-the-job training program) building enterprise web applications with .NET, Angular, and Vue, and some hands-on work in Golang. Comfortable developing backend APIs, asynchronous processing, and reusable frontend components, and applying clean architecture and SOLID principles in real projects. Eager to keep growing in backend development, performance optimization, and system design.

EDUCATION

FPT University

Bachelor of Software Engineering

Hanoi, Vietnam

Oct. 2021 – Dec. 2025

EXPERIENCE

Full-stack Developer

ezCloud Technologies Pte Ltd

Nov. 2025 – Present

Hanoi, Vietnam

Overview: Comprehensive management solution for 3-5 star hotels and guesthouses, integrating modules for restaurant, bar, golf course, and room-by-room power management.

Team Size: 12

Key Contributions:

- Delivered a new accommodation declaration reporting feature within one week, ensuring compliance with updated government regulations.
- Developed a reservation restoration feature for No-show and Cancelled bookings, enabling hotels to recover reservations while preserving reporting accuracy and operational workflows.
- Improved account security by implementing asynchronous session invalidation via third-party API integration, using background processing to avoid blocking the main application workflow.
- Built a real-time dual-screen solution using SignalR, allowing hotel staff and guests to interact with invoice and QR information simultaneously.

Technologies: Vue.js 2, ASP.NET Framework, Redis, RabbitMQ, SQL Server, SQL Toolbelt, Aspose Cells, Kendo UI, SortableJS, Bryntum Scheduler, Bootstrap Vue, Stored Procedures, SignalR.

Software Engineer

Viettel Software

Jan. 2025 – Oct. 2025

Hanoi, Vietnam

Overview: A cybersecurity intelligence platform enabling early risk detection, enhanced visibility, and proactive defense.

Team Size: 15

Key Contributions:

- Developed a reusable table component with configurable columns, data formatters, and custom styling, improving frontend development efficiency and consistency.
- Developed Excel import functionality for CVE data, supporting up to 25,000 records using chunked upload processing.
- Developed a feature for analyzing CVEs and vulnerabilities, assessing severity, and providing actionable remediation insights for cybersecurity operations.
- Developed a reusable Common Search component with lazy-loaded type-ahead suggestions, emitting input queries for external data fetching and returning selected results to the parent.
- Developed a feature to export Excel reports on phishing websites, data leaks, and other cyber threats, supporting proactive risk mitigation.

Technologies: Golang (Gin, Echo), Angular 12, Elasticsearch, PrimeNG, Angular Material, NG-ZORRO.

Full-stack Developer (OJT)

FPT Software

Sep. 2024 – Dec. 2024

Hanoi, Vietnam

Overview: Structured On-the-Job Training (OJT) program, gaining hands-on experience and following a development roadmap toward a Full-Stack (.NET and Angular) role.

Key Contributions:

- Developed and maintained web application features using ASP.NET Core, Angular, and Entity Framework Core.
- Applied Clean Architecture principles to build maintainable and testable features.
- Organized frontend code using a Feature-Based Architecture to improve modularity and reusability.
- Used Amazon Web Services (AWS S3) for file storage as part of the deployment workflow.
- Wrote clean, documented code following SOLID principles and team coding standards.

Technologies: ASP.NET Core, Angular, SQL Server, NG-ZORRO

PROJECTS

FU Judge | *ASP.NET Core, PostgreSQL, Angular, Docker, AWS, Git*

Sep 2025 – Dec 2025

- Built a competitive programming platform (graduation project) supporting contests, automated judging, and real-time leaderboards.
- Implemented automated judging, real-time result updates, and problem management.
- Used asynchronous judging to run evaluations in the background without blocking user workflows.
- Designed the backend with Clean Architecture and structured the frontend with a feature-based approach.
- Gitlab:
 - BE: <https://gitlab.com/sep4902321029/pulse-api>
 - FE: <https://gitlab.com/sep4902321029/orbit-ui>

TECHNICAL SKILLS

Languages: C#, Golang, SQL (SQL Server, PostgreSQL), JavaScript, TypeScript, Java (basic)

Frameworks: .NET / ASP.NET (Core & Framework), Angular, Vue.js 2, Gin

Developer Tools: Git, Docker, AWS (S3), Redis, RabbitMQ, SignalR

AI Tools: GitHub Copilot, ChatGPT, Claude Code

CERTIFICATES

Foundational C# with Microsoft

Software Development Lifecycle

Web Design for Everybody: Basics of Web Development & Coding
